

## Environmental Policy Statement

Green Park recognises that environmental considerations should be integrated into our everyday working practices and embedded into our corporate values. This policy sets the framework for the way we manage our impact on the environment in the properties that we manage.

### Our commitment

- o Green Park is committed to respecting, protecting and improving the environment in which we operate whilst maintaining commercial viability, long term profitability and enhancement of our reputation.

### Our plan is to:

- o Assess the impact of our operations on the environment and implement a continuous improvement plan to control and minimise our environmental impacts and prevent pollution.
- o Set objectives and targets and monitor our performance against them to ensure continual improvement.
- o Regularly review our objectives and targets to ensure they are appropriate and achievable.

### Our objectives are:

- o To communicate with our stake holders, including our employees, clients, occupiers, suppliers and contractors to raise awareness of environmental issues and ensure effective management of our environmental impacts.
- o To incorporate environmental considerations, including the sustainable use of resources and materials into the design process of projects and enhancement works.
- o To promote the efficient use of resources and reduction in the production of greenhouse gas emissions, and promote the minimisation, re-use and recycling of waste arising from our activities.
- o To enhance the natural environment of the estate and improve its biodiversity
- o To use our influence to improve environmental performance in our supply chain and encourage purchasing of sustainable products and materials.
- o To comply with all applicable legal requirements and environmental good practice.
- o To continually improve our environmental management system in order to enhance environmental performance.

### Management

- o We will continue to evolve our ISO 14001 and 50001 certified (Environmental and Energy Management Systems) to effect the plans and to monitor and adhere to our Environmental and Energy Policy commitments.
- o All our employees are responsible for the implementation of this policy and will be provided with the relevant information and instruction to do so.
- o Ultimately, GPM will take responsibility for the provision of adequate resources to ensure that our environmental objectives are met or exceeded, and we will hold a Management Review meeting at least annually to plan and progress our environmental programmes.
